1. For Not Logged in Users

1.a. Home Page

The user who are not logged in can see the book titles and just author and release informations in the main page. They can search for books in the main page just like other users.

1.b. See Book Information

Like we told above the selection is done by clicking the row at the list which can be seen above figure. Unsigned users can see author and release informations only in the book information page. Because they are not allowed to do anything else the buttons for normal users like borrow or add to wait list can't be seen without log in operation.

1.c. Login Page

Not logged in users can go to login page by clicking the button which is placed in the right above corner since it is common for almost every web sites. In this page only two informations are needed to log in which are email and password. For users that are not signed in there is a line which is the link for sign up page.

<u>Hesabınız Yoksa Hemen Üye Olun!</u>	

1.d. Sign up Page

Users can access to sign up page by two ways. Firstly they can click the button which is placed in right above corner next to login button. Other way is through the link in the log in page which is mentioned and can be seen above figure. In this page users have to enter the informations which are needed to create an account. These are name, surname, email and password. After pressing the sign up button ("Kayıt Ol"), the site will direct the user to logged in user home page.

2. Logged In User(Normal User)

2.a. Home Page

Users will access this page through login or sign up. In addition to not logged in users they can see the availability situation for every book in the list. They have several buttons which allows them to access operations they can perform about their account.

2.b. Book Information For Unavailable Books

When users clicked the book they wanted in the list showed above, they will see the information about that book and a button placed in right below corner for adding their name to wait list for that book. If the user is already in the waiting list or if they have the book currently they don't see this button.

2.b.1. Users who are not in the waiting list

2.b.2. After adding to waiting list

2.b.3. Users who are in the waiting list

2.c. Book Information For Available Book

If user chooses a book which is available, apart from informations seen above figure they also see a button which is placed in right below corner to borrow the book. When they press this button system loans the book to user for 14 days and leads user to view my books section.

2.d. View My Books

User can access to this page by pressing the button "Kitaplarımı Görüntüle" which is in the right above corner. In this page users can see the information about the books they have borrowed such as name, author, loan date, return date, return situation and if they have time until the return date number of days till the return date. If they have passed the return date, how much they should pay for issue late which is 1 TL for every day.

2.d.1. Current day is between the loan and return dates

2.d.2. Current day has passed the return date

Users can see the book informations and can return the book if they haven't already by clicking the row of that book in the list seen above.

2.d.3. My book information while current day is between the loan and return

dates

2.d.4. My book information while current day has passed the return date

2.e. My Informations

Users can see and change their information in this page. To access this page users should click the button "Bilgilerimi Görüntüle" in the right above. In this page the informations about the user which are name, surname, email come filled and if the users want to change them they can write the new informations in this sections. There are two button in the right below which are for update informations and change password.

2.e.1. See my information
